SUMMARY

I am proficient in all aspects of MERN stack development, including MongoDB, Express Js, React Js, and Node Js. I have experience in both front-end and back-end development, and I am comfortable with database design and development using MongoDB. My approach to software development is centered around clean, maintainable code that can be easily tested and adapted. I am committed to continuous learning and growth, and I stay up-to-date with the latest trends and best practices in software development.
