

Tamiyah Suleman

Software Quality and Automation Engineer

A computer System Engineer who is seeking the opportunity to work in a challenging work environment which will be beneficial for my learning and experience. During last 2, years I was able to develop few web projects and also got firm grip on various subjects like Data Analytics, web, Engineering, C++, Software validation and verification, Software engineering, Digital system design naming a few. I am currently working on above mentioned skills just to acquire more and more knowledge so that i will prove to be a great asset for the organization I will work with.

WORK EXPERIENCE

Software Quality Engineer SMJ Solutions LLC

01/2019 - 09/2019

Dubai, Arab Emirates

Software Quality/ Automation/load stress Engineer

Introtech solutions

12/2021 - Present

Lahore, Pakistan

PROJECTS

Jet Aircrafts Maintenance

FYP Prognostic Maintenance of Jet Aircrafts using Data Analytics Techniques. The problem with the jet aircrafts was that cracks would appear in the engine of Jet aircrafts after having some flights. They used to check for those cracks manually having a scheduled maintenance. They would open the Jet Engine and check it for cracks. Sometimes by doing so the engine would have some cracks in it. Our project was to use Data Science Techniques to observe the data before the cracks and after the cracks and use that data in future to detect the cracks.

WordPress

A website using WordPress for online clothing. I used plugin WooCommerce for payment options,themify as the theme.

Digital Clock

I designed and implemented a digital clock using logic gates (using 10-bit ripple counter And gates, Or gates, diodes)

TIC TAC TOE

I designed a game in oop, TIC TAC TOE

EDUCATION

Bachelors in Software Engineering Government college and University,Lahore

06/2016 - 12/2020

3.45 CGPA

SKILLS

Regression testing, Performance testing, Load and stress testing, Functional/Non- functional testing, Black box /white box testing, writing test scripts in automation, Page object model, selenium, writing test scripts and execute test scripts, swagger, Java script, JMeter, smoke testing, sanity testing,SDLC,STLC
