

Muhammad HASHIR

Computer Engineer

Graduated in Computer Engineering. I have experience as an Artificial Intelligence (AI) Specialist with a passion for developing innovative solutions that leverage machine learning, natural language processing, and computer vision technologies. Strong problem-solving and analytical skills, with the ability to identify and address complex issues in AI systems. I've been an active student throughout my academic years. I am a working professional with love for what I do. Adept at motivating self and others. The main objective is to work and grow with a prestigious organization that offers growth opportunity. Where the efficient and hard-working people with vision are mattered and where talent is considered as a competitive edge over competitors
