PROJECTS

International Finance

March – April 2023

Impact of IMF's Policies on a Country's Economic Growth

- Focusing on 2 countries, Ghana and Egypt, and exploring their history leading up to their IMF Bailout
- Providing a detailed analysis on the impact of the IMF's policies on each country's certain macroeconomic variables before and after their IMF Bailout
- Coming to the conclusion that the IMF's policies alone cannot lead to economic growth within a country, but rather a large structural change needs to take place for a country to escape its economic and financial difficulties and experience growth.

Mind the App
