Relevant Courses

- Computer Programming
- OOP
- Digital Image Processing
- Data Structures & Algos
- Database Management Sys
- Data Analytics

PROJECTS

○ Covid 19 Analysis

Deep Learning

Deep learning based detection of COVID-19 from chest X-ray images

Achievements/Tasks

- we train, evaluate and test three well-known pre-trained deep learning architectures to classify chest radiography images for a two-class classification: COVID-19 and non-COVID-19 chest X-ray. VGG16, ResNet50 and InceptionV3 are mainly used as deep learning models
- Deploy Heruko

○ United States Accidents(Data Analysis)

Exploratory data analysis

Achievements/Tasks

- Pandas for data analysis
- NumPy mathematical operations on arrays
- Matplotlib plotting library for python
- Summarize Different Output

○ Python Scrapy

Creating Datasets

Achievements/Tasks

- Known the architecture of scrapy
- Scrape data from ecomers site like amazon,glassdoor
- also complete best seller course i,e Modern Web scraping With Python using Scrapy and Splash
