Employee Attendance

Attendance API can be used to capture the check-in and check-out entries of an individual employee. The system will mark the attendance of individual employees.

POST Check-in

```
{{Url}}/api/organization/7/attendance/check_in/1001/
```

Check in API is used when an employee needs to checked in to the system. In the API URL, organization_id will be static that is 4 and in emp_code, code of each specific employee is passed. For check-in API POST method is used.

Cases:

1. Check by passing wrong org and employee id in URL.
2. check by passing valid org and employee id in URL.
3. Check if correct employee name is appearing or not.
4. verify all the daa appearing in response body.
5. Check if correct time is appearing and check time format.
6. Check if current date is appearing in date serialier.

PARAMS

PATCH Check-out

```
{{Url}}/api/organization/7/attendance/check_out/1001/
