SQL

Python

Java script

OOP

C++

WORK EXPERIENCE

Intern at Data Analytics Department | Paid Internship

Systems Limited l E-1, Sehjpal, near DHA Phase-VIII   2022 May-July

-Sound knowledge of probability and statistics.

-Proficiency in SQL and database design

-Experience with scripting/programming languages: Python, C++

-Integration of SQL database into SSIS and other

-Worked with data visualization and analytics

-Designing and developing BI dashboards

-Prepare and present comprehensive report/summary of conclusions drawn from the analysis

-Deliver analytic insights in several business domains including consumer, customer, digital, and financial markets.

PROJECTS

Made practice projects using kaggle datasets to perform data visualization cleaning and manipulation of data. Data sets such as country economy, gender forecast geography and business trend data sets etc. My main project was on Covid 19.

COVID'19 Data Visualization
Monitoring the evolution of COVID-19 cases to make informed policy decisions (e.g., lockdowns) and to analyse information so that appropriate public health measures can be taken.

Performing Exploratory Data Analysis
Used EDA to analyse the structure of data, to identify patterns and characteristics. Furthermore, it was used to help cleaning data, extracting important variables and testing assumptions using statistical graphics and other data visualization methods in my Covid-19 Project.

Market Basket Analysis - Final Year Project
Performing analysis on market purchasing patterns that to observe the customers to identify various combinations of products that are purchased together.

Project Management Project
Created a project management project on Primavera taking in account of the examples of projects and made it on them. The project was based on Padma Bridge in Bangladesh. Activities such as creating the timelines taking out baseline of the project was used by the data given and created. I have also worked on Jira for my Software Engineering Project .
