Experience

2022 - 2022
Company Name l Coding crust

Internship

App Name:Mr jobby

I started my internship as a junior flutter developer. the app will be an android, ios, mac os based app. basically my role in this app is UI design of the app and some, find of pis integration in this. the app must be like a jobber who posts a job daily based on routine. like a home cleaning job, interior painting job, shifting a house from one place to another other, etc. in the app there are two scenarios one is the applicant side who posts a job daily bases and the other one is who see the job and applied for a job he wants simple.

2022 - 2022
University project l Lahore leads university

Fyp:Meat cuts

when i started fyp in our last semester Im making a app about meat only on meat of every animal like a halal animals my role in this application will be a full fledge app but due to some reason I will not completed the app because i completed my app by our own hand but some how . in our app there fore one most popular option is in it some people out of countries and he want to qurban qurbani on occeans of eid festivals but countries rules are not permissined .i will qurban their animal from our side. our client was fully satisfied. one most comm.on feature of our app is people are booked their qasai on occasion of their eid festival

Practise based project

i have build small ui based project in frontend web development
Tools

Visual studio code, Android studio, git

Certificate
